Overview

This repository is for ongoing projects involving analysis of the economic impact of broadband technologies across the United States. The main goals of the analysis is to determine:

- Whether there is a causal connection between broadband infrastructure and increases in employment.
- Estimating

Order of Execution

This project utilizes R and RStudio for downloading, tidying, summarizing, and analyzing data across various sources.

0. file: 0-data-compile.R (should take around. . .)
1. file: 1-. . .

Packages Needed

Do need to install the readr package from Hadley Wickham's Github with:

```
# install.packages("devtools")
devtools::install_github("hadley/readr")
```

Further, other packages needed include:

- gdata
- maptools
- plyr
- raster
- reshape2
- rgdal
- spdep
